

TRIUM ALTERNATIVE GROWTH FUND

OCTOBER 2025 MONTHLY NEWSLETTER

F GBP: +1.7% YTD: +6.0% | I GBP: +1.7% YTD: +5.9%

Strategy Description

- ▶ The Trium Alternative Growth Fund uses Uncorrelated Strategies sourced from across the asset class spectrum to provide capital growth, independent of equity market cycles and macroeconomic environments. The Fund targets areas of markets that demonstrate significant crowding and congestion. Congested markets cause short and long-term price distortions, and these can be monetised without taking directional market exposure.
- ▶ Congestion style trades are naturally defensive and tend to have their best returns during periods of stress. Therefore, Fund has a defensive profile and has demonstrated both a consistent negative correlation and beta with equity markets.
- ▶ The Fund aims for Cash + 3-4% annualised return with a relatively low volatility of 3-5%.

Portfolio Manager's commentary

October saw broad gains across most asset classes, extending a multi-month rally driven by the AI tech sector. Bonds were the only asset class that produced a slight negative return, while gold had another explosive start to the month, only to give up some of its returns with an uncharacteristic drawdown as momentum investors took profits.

While there was no real news on the macro front during the month, October marked the highlight of the equity investors' calendar as the mega-cap tech sector announced a flurry of interconnected deals, with each other, to buy GPUs, compute and hardware for an epic coordinated data centre rollout. Given each announcement, stock prices took turns in popping higher throughout the month, yet as the show went on, it became increasingly concerning (to me, at least) as to where all the money for these deals would come from. As an example, OpenAI has \$1.4 trillion in commitments with only \$20bn or so on its balance sheet. Given the lacklustre capital raise from Coreweave's recent IPO and the recent retracement of bank lending and private equity from the sector, the only possible route to finance this spending binge is via the public debt markets. Yet, just as the IPOs are not well subscribed, the public debt markets gave a resounding no to further financing with a spectacular blowout in spreads.

So October saw a bizarre market price action whereby equity tech investors dined out on stellar returns, credit investors began to dump the bonds: Oracle was the worst offender, and with an already stretched balance sheet, saw its spreads spike to default-like levels. The problem is that, given the interconnected nature of all these deals, the tech sector has created a scenario where a failure in one part of the chain risks all, making the sector now too big to fail with systemic levels of risk. Likewise, the bond markets simply can't absorb all this credit. To this end, Oracle's Executive Vice Chair, Safra Catz, concurred, "without some form of government backstop, like loan guarantees or shared risk, these commitments could strain even the strongest balance sheets.". Well quite.

And if the embattled taxpayer is to be coopted into backstopping datacentre spend, this dovetails (coincidentally no doubt) with the Trump administration's recent launch of the genesis mission – a "Manhattan project" for AI, whereby a public-private partnership will work to secure U.S. technological AI dominance of which datacentres are critical. While it's perhaps too soon to be sure, it does feel that the October deal frenzy has set the stage for a merger of state and corporate interests for all things AI, and if the government (or rather the taxpayer) does officially get behind the sector, then the siren calls for the bursting of the bubble may have to wait a little longer.

Portfolio Manager's commentary (*Continued*)

The portfolio had a decent month, with the fund up 1.7% (F GBP). The contributions to returns were well spread across the portfolio.

Our best-performing strategies were our long-term congestion strategies in individual equity volatility. October's deal fest produced outsized positive stock returns across the sector. As our vol strategies are designed not only to be long volatility (upside vol as well as downside vol), but they also have a long gamma exposure, which simply means that any daily stock price move (up or down) that is larger than what would be considered 'normal' for the stock, accrues as positive P&L.

Our worst-performing strategy was our quality 'strong balance sheet' strategy. Quality, especially high credit quality, has not been an in favour factor these last few months, and while it should always do well when there are any signs of credit stress, the credit stress in certain tech names is in no way spread across the market.

Portfolio Characteristics

Fund Realised Volatility	3.85%
Fund Expected (Ex-Ante) Volatility	4.24%
1d 99% VaR	0.58%

Fund Realised Volatility is calculated based on F GBP returns since inception.

Fund Ex-Ante Volatility is calculated based on expected standard deviation of the portfolio components expressed on an annual basis.

Daily VaR (99%) is an alternative measure of risk that estimates maximum expected loss. At 99% confidence, one can expect that there will be at least 1 day in 100 where the daily loss on the Fund exceeds the calculated VaR.

Important Information (continued)

Forward looking statements

Certain information contained in this document constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "may," "will," "should," "expect," "anticipate," "target," "project," "estimate," "intend," "continue" or "believe" or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of the fund may differ materially from those reflected or contemplated in such forward-looking statements.

An investment in the fund may not be suitable for all investors and may only be suitable only for certain financially sophisticated investors who meet certain eligibility requirements, have no need for immediate liquidity in their investment, and can bear the risk of an investment in a fund for an extended period of time.

Past performance

Any performance data and/or past performance is not a reliable indicator of future returns and the value of investments and the income derived from those investments can go down as well as up. Future returns are not guaranteed, and a loss of principal may occur. Performance may be affected by economic and market conditions. Returns may increase or decrease as a result of currency fluctuations.

Performance data of the fund is not based on audited financial data. Any performance data is based on the fund's actual or expected net asset value in accordance with the valuation methodology in the prospectus. Performance may be impacted by capital contributions and withdrawals and unless otherwise stated is net of management, performance and other fees as described herein and includes reinvestment of earnings.

Where any performance is referenced, please note that past performance is not a reliable indicator of future returns. Where simulated or scenario based performance is referenced, please note that the scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and/or current market conditions and are not an exact indicator. What you will receive will vary depending on how the market performs and how long you keep the investment/product.

Fees

The fund's fees may be modified or waived for certain investors. Please refer to the prospectus for more information regarding the fund's fees and other terms. An investor's actual performance and actual fees may differ from the data reflected herein due to among other factors, different share classes and eligibility to participate in "new issues". It should also be noted that certain share classes of the fund may be closed, including the share class from which the performance data presented herein has been derived.

Use of indices

Information about market indices is provided for the purpose of making general market data available as a point of reference only. There is no representation that any index is an appropriate benchmark for comparison. Index returns do not take into account trading commissions and costs or other fees and expenses associated with the active management of portfolios. The volatility of indices may be materially different from the performance of the fund. The fund's holdings may differ substantially from the securities that comprise the indices. Furthermore, the fund may invest in different trading strategies from the indices and therefore it should be noted that the sector, industry, stock and country exposures, volatility, risk characteristics and holdings of the fund may differ materially from those of the indices. The performance returns of the indices include the reinvestment of earnings and are obtained from Bloomberg and other third party sources. Although Trium believes these sources to be reliable, it is not responsible for errors or omissions from these sources.

GICS Standard

This report is not approved, reviewed or produced by MSCI. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's and "GICS®" is a service mark of MSCI and Standard and Poor's.

Risks

Investing in financial markets involves a substantial degree of risk. There can be no assurance that the investment objectives of the fund will be achieved, and the investment results may vary substantially from year to year or even from month to month. Investment losses may occur, and investors could lose some or all of their investment. No guarantee or representation is made that the fund's investment program, including, without limitation, its diversification strategies, or risk monitoring goals, will be successful. Investment results may vary substantially over time. Investment losses may occur from time to time. Nothing contained in this document is intended to imply that the fund's investment methodology may be considered "conservative", "safe", "risk free" or "risk averse". Economic, market and other conditions could also cause the fund to alter its investment objectives, guidelines, and restrictions.

The fund may engage in investment practices or trading strategies that may increase the risk of investment loss and a loss of principal may occur. Trium may have total trading authority over the fund, and the fund will be dependent upon the services of Trium. The fund's fees and expenses as described in the funds' prospectus may offset the fund's gains. In addition, there may be restrictions on transferring interests in the fund, please refer to the fund's prospectus for additional information.

Where risks or rewards of purchasing shares in any fund are referenced, please refer to the risks outlined in either the KIID or prospectus. Any fund managed by Trium will be subject to, inter alia, the following risks:

- **Market price risk** any investment fund is subject to fluctuations in the value of its investments. For UCITS funds, an indicator of market risk is set out in the fund's Synthetic Risk Reward Indicator (SRRI), which is available in the fund's KIID.
- **Foreign exchange risk** investments in the fund may be subject to fluctuations in foreign exchange rates.
- **Derivatives & leverage risk** derivatives can change in value rapidly and may cause losses to any investment fund
- **Credit Risk** the fund is exposed to the risk that the issuer of any debt securities invested in fails to meet its obligations.
- **Counterparty/Custodial Risk** a counterparty with whom a fund contracts or a custodian holding a fund's assets may fail to meet its obligations or become bankrupt, which may expose that fund to a financial loss.
- **Liquidity Risk** is the risk that there are insufficient buyers or sellers of a given investment to allow an investment fund trade readily which may impact the fund's performance or (in extreme circumstances) an investor's ability to redeem.
- **Operational Risk** human error, system and/or process failures, inadequate procedures or controls can cause losses to any investment fund.

More information in relation to risks in general may be found in the "Investment Risks and Special Considerations" section of the prospectus. The fund may use leverage. The use of leverage creates special risks and may significantly increase the fund's investment risk. Leverage creates an opportunity for greater yield and total return but, at the same time, exposes the fund to greater capital risk than an unlevered vehicle.
