

TRIUM CLIMATE IMPACT FUND

FEBRUARY 2026 MONTHLY FACTSHEET

F EUR: -0.1% YTD: -0.1% D EUR: -0.1% YTD: -0.1% I EUR: -0.2% YTD: -0.2%

Strategy Description

- ▶ The Trium Climate Impact Fund is an Article 9 equity long/short market neutral strategy that aims to generate attractive long-term returns with low correlation to traditional asset classes. The Fund also aims to drive positive environmental outcomes, addressing challenges such as climate change, waste management and water access.
- ▶ The Portfolio Managers invest in environment solution companies with robust business models that they believe will outperform over time, looking for the best impact at the most attractive valuation. Market and other factor risks are mitigated with offsetting short positions, which include alpha short positions. The portfolio aims to create significantly more avoided emissions than direct emissions, treat significantly more water than water consumed, and collect/recycle significantly more waste than waste generated.
- ▶ The Fund intends for all long holdings to be aligned with a net zero pathway by 2040. To that end, long holdings should adopt a binding net zero commitment or have validated science-based emissions reduction targets under a recognised framework.

Portfolio Managers' commentary

The Fund was flat over the month, with year-to-date returns at -0.1%. Top contributors in February were a French utility and a UK utility, with the largest detractors including a US solar company and a US packaging company.

We are currently focused on the news flow around potential modification of EU carbon regulations. We have written on this previously, as the current regulatory regime would significantly tighten and expand carbon markets in Europe. Carbon regulation in Europe has been changed several times over the last decade, and we expect that politicians will continue to amend the system in the future to accomplish their policy goals. We believe that politicians want to solve for an outcome that will create industrial growth, and lower electricity prices. Carbon regulation is one part of that equation. We would be surprised if the EU changed carbon policy in a manner that hurt European utilities or reduced incentives to add electricity grids or capacity. We think changes will be focused on remediation of system costs on consumers and industrial emitters, while still preserving a decarbonisation incentive.

Portfolio Managers

Joe Mares, Co-Portfolio Manager

worked at some of the largest banks and hedge funds in the world. He began his career at Morgan Stanley in 1997 in investment banking and equity research in energy & shipping. In 2007, Joe moved to the buy side, as lead Equity & Commodities Analyst for Greg Coffey, at GLG and then Moore Capital, from 2009. Joe was a Portfolio Manager at Société Générale from 2011-2016, responsible for a global long/short equity book focused on energy, resources, shipping, and utilities. Joe holds a Bachelor's degree from the School of Public and International Affairs, Princeton University.

SFDR

The fund discloses sustainability-related information in accordance with Regulation (EU) 2019/2088 ("SFDR"). Further information regarding sustainability-related aspects of the fund provided pursuant to Article 10 of SFDR can be found here: <https://trium-capital.com/regulatory-disclosures/>

Important Information (continued)

Use of estimates

The estimates, investment strategies, and views expressed in this document are based upon past or current market conditions and/or data and information provided by unaffiliated third parties (which have not been independently verified), may differ from estimates, investment strategies, and views set out in other documents published by Trium and are subject to change without notice. No representation or warranty is made as to the correctness, completeness and accuracy of data and/or information provided by unaffiliated third parties or as to any assessment made on such basis.

Confidentiality

This document is confidential and is not intended for distribution to or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation. The distribution of this document and/or the information contained herein in certain jurisdictions may be restricted, and, accordingly, it is the responsibility of any recipient to satisfy itself as to compliance with relevant laws and regulations.

This document may not be divulged to any other person, reproduced or transmitted without the express written permission of Trium. The information contained in this document is strictly confidential and is intended only for use of the person to whom Trium has provided the material, and no other person should rely or act upon it.

Forward looking statements

Certain information contained in this document constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "may," "will," "should," "expect," "anticipate," "target," "project," "estimate," "intend," "continue" or "believe" or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of the fund may differ materially from those reflected or contemplated in such forward-looking statements.

An investment in the fund may not be suitable for all investors and may only be suitable only for certain financially sophisticated investors who meet certain eligibility requirements, have no need for immediate liquidity in their investment, and can bear the risk of an investment in a fund for an extended period of time.

Past performance

Any performance data and/or past performance is not a reliable indicator of future returns and the value of investments and the income derived from those investments can go down as well as up. Future returns are not guaranteed, and a loss of principal may occur. Performance may be affected by economic and market conditions. Returns may increase or decrease as a result of currency fluctuations.

Performance data of the fund is not based on audited financial data. Any performance data is based on the fund's actual or expected net asset value in accordance with the valuation methodology in the prospectus. Performance may be impacted by capital contributions and withdrawals and unless otherwise stated is net of management, performance and other fees as described herein and includes reinvestment of earnings.

Where any performance is referenced, please note that past performance is not a reliable indicator of future returns. Where simulated or scenario based performance is referenced, please note that the scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and/or current market conditions and are not an exact indicator. What you will receive will vary depending on how the market performs and how long you keep the investment/product.

Fees

The fund's fees may be modified or waived for certain investors. Please refer to the prospectus for more information regarding the fund's fees and other terms. An investor's actual performance and actual fees may differ from the data reflected herein due to among other factors, different share classes and eligibility to participate in "new issues". It should also be noted that certain share classes of the fund may be closed, including the share class from which the performance data presented herein has been derived.

Use of indices

Information about market indices is provided for the purpose of making general market data available as a point of reference only. There is no representation that any index is an appropriate benchmark for comparison. Index returns do not take into account trading commissions and costs or other fees and expenses associated with the active management of portfolios. The volatility of indices may be materially different from the performance of the fund. The fund's holdings may differ substantially from the securities that comprise the indices. Furthermore, the fund may invest in different trading strategies from the indices and therefore it should be noted that the sector, industry, stock and country exposures, volatility, risk characteristics and holdings of the fund may differ materially from those of the indices. The performance returns of the indices include the reinvestment of earnings and are obtained from Bloomberg and other third party sources. Although Trium believes these sources to be reliable, it is not responsible for errors or omissions from these sources.

GICS Standard

This report is not approved, reviewed or produced by MSCI. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's and "GICS®" is a service mark of MSCI and Standard and Poor's.

Risks

Investing in financial markets involves a substantial degree of risk. There can be no assurance that the investment objectives of the fund will be achieved, and the investment results may vary substantially from year to year or even from month to month. Investment losses may occur, and investors could lose some or all of their investment. No guarantee or representation is made that the fund's investment program, including, without limitation, its diversification strategies, or risk monitoring goals, will be successful. Investment results may vary substantially over time. Investment losses may occur from time to time. Nothing contained in this document is intended to imply that the fund's investment methodology may be considered "conservative", "safe", "risk free" or "risk averse". Economic, market and other conditions could also cause the fund to alter its investment objectives, guidelines, and restrictions.

The fund may engage in investment practices or trading strategies that may increase the risk of investment loss and a loss of principal may occur. Trium may have total trading authority over the fund, and the fund will be dependent upon the services of Trium. The fund's fees and expenses as described in the funds' prospectus may offset the fund's gains. In addition, there may be restrictions on transferring interests in the fund, please refer to the fund's prospectus for additional information.

Where risks or rewards of purchasing shares in any fund are referenced, please refer to the risks outlined in either the KIID or prospectus. Any fund managed by Trium will be subject to, inter alia, the following risks:

- **Market price risk:** any investment fund is subject to fluctuations in the value of its investments. For UCITS funds, an indicator of market risk is set out in the fund's Synthetic Risk Reward Indicator (SRRRI), which is available in the fund's KIID.
- **Foreign exchange risk:** investments in the fund may be subject to fluctuations in foreign exchange rates.
- **Derivatives & leverage risk:** derivatives can change in value rapidly and may cause losses to any investment fund
- **Credit Risk:** the fund is exposed to the risk that the issuer of any debt securities invested in fails to meet its obligations.
- **Counterparty/Custodial Risk:** a counterparty with whom a fund contracts or a custodian holding a fund's assets may fail to meet its obligations or become bankrupt, which may expose that fund to a financial loss.
- **Liquidity Risk:** is the risk that there are insufficient buyers or sellers of a given investment to allow an investment fund trade readily which may impact the fund's performance or (in extreme circumstances) an investor's ability to redeem.
- **Operational Risk:** human error, system and/or process failures, inadequate procedures or controls can cause losses to any investment fund.

More information in relation to risks in general may be found in the "Investment Risks and Special Considerations" section of the prospectus. The fund may use leverage. The use of leverage creates special risks and may significantly increase the fund's investment risk. Leverage creates an opportunity for greater yield and total return but, at the same time, exposes the fund to greater capital risk than an unlevered vehicle.
