TRIUM ESG EMISSIONS IMPROVERS FUND

DECEMBER 2024 MONTHLY FACTSHEET

F EUR: -1.2% YTD: -3.6% | EUR: -1.3% YTD: -4.1% | SI EUR: -1.2% YTD: -3.8%

Strategy Description

- ➤ The Trium ESG Emissions Improvers Fund has twin aims to make an improvement on the environment by helping to combat global warming, while, at the same time, seeking to generate absolute returns, with a low correlation to traditional asset classes and other ESG products.
- ▶ The Portfolio Manager identifies companies that have the potential to significantly reduce their environmental footprint relative to their peers and the broader market. He sets out to constructively engage with these companies to encourage them to reduce their emissions. Market and other factor risks are mitigated with offsetting short positions, which will include alpha short positions.

Portfolio manager's commentary

- ➤ The Trium ESG Emissions Improvers Fund had a frustrating last month of the year ending down -1.2%.
- ▶ On a longer-term view, our disappointing performance in 2024 was driven by the highemitting and environmental sectors under-performing broader markets, increasing political risk over environmental policies, and stock-specific disappointments. Our overall investment universe is now more attractive relative to broader markets, with positive structural themes of rising electricity demand and under-investment in buildings and infrastructure. We believe political risk is now priced into markets, and even climate sceptics prefer cheaper and more efficient energy and materials solutions.
- ▶ Our Fund is also focused on engagement with our core holdings on environmental and strategic improvements. One of our engagement themes for 2025 will be share buybacks and improving shareholder returns. Most of our portfolio companies have been performing well on financial and environmental targets but have disappointed on share performance which we are bringing to management focus in 2025.
