#### Investment Objective and Policy

The Fund's investment objective is to seek to achieve positive returns over the medium term (3 years), in all market conditions.

Trium Capital LLP (the "Investment Manager") intends to achieve this objective by investing in a diversified portfolio of global investments, as detailed below. It is intended that the Fund will have a global focus in relation to the assets in which it will invest, though it is anticipated that the Fund will have significant investments in Europe, North America and Asia. The Fund has the flexibility to use a wide range of instruments including (but not limited to), equities, bonds, foreign exchange, depositary receipts, UCITS eligible commodity indices and Exchange Traded Commodities, and futures and options.

The Fund may invest in FDIs (i) for investment purposes, (ii) to attempt to hedge some of its investment risk, or (iii) for the purposes of efficient portfolio management. The Fund's use of FDI may introduce leverage into the Fund, the risk of which is discussed under FDI and Leverage Risk below.

The Fund may also, for cash management purposes, invest in fixed-income instruments (including sovereign, corporate or government bonds which may be fixed or floating, investment grade as rated by a recognised credit rating agency).

Any realized income less expenses will be accumulated and reinvested into the net assets of the Fund.

Investors can redeem shares each day (except Saturdays and Sundays) on which banks in London and Dublin are open for regular business.

For full investment objective and policy details, please refer to the "Investment Objective" and "Investment Policy" sections of the Fund's supplement.

**Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.**

**Financial Derivative Instruments ("FDIs"):** a contract between two or more parties whose value depends on the rise and fall of the underlying asset.

#### Risk and Reward Profile

The Fund is categorised as a 4 due to its exposure to equity markets, which combined with its use of FDI, may cause the price of shares to fluctuate moderately.

The risk indicator was calculated using simulated data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

**Equities Risk:** equity investments are subject to greater price fluctuation than other asset classes due to such factors as a company's business performance, investor perceptions, stock market trends and general economic conditions which cause the Fund's share price to fluctuate more rapidly.

**FDI and Leverage Risk:** FDI may fluctuate in value rapidly and certain FDI may introduce leverage, which may result in losses that are greater than the original amount invested.

**Counterparty/Custodial Risk:** a party with whom the Fund contracts for securities or to safekeep the Fund's assets may fail to meet its obligations or become bankrupt, which may expose the Fund to a financial loss.

**Liquidity Risk:** there may be insufficient buyers or sellers to allow the Fund to buy or sell certain types of securities readily which may impact the Fund's performance or (in extreme circumstances) an investor's ability to redeem.

**Interest Rate Risk:** the present value of any future returns from an investment varies inversely with the prevailing level of interest rates

**Currency Risk:** changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of performance where the Fund invests in non-USD securities.

**Class Currency Hedging Risk:** while the Fund may attempt to hedge against currency fluctuations for non-USD classes, there can be no guarantee that the value of such class will not be affected by fluctuations in USD against the relevant currency.

**Operational Risk:** human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

Please refer to the section entitled "Investment Risks and Special Considerations" in the Company's prospectus for additional information on these and other risks associated with an investment in the Fund.
