- Class N GBP Shares (IE000MFG9AA1)

Investment Objective and Policy

The Investment Manager deploys capital using a range of underlying strategies including but not limited to, long/short equity, global macro, credit, event driven and market neutral. The underlying strategies will be diversified across investment styles (e.g. it may be a combination of fundamental and quantitative or other strategies), market sectors, asset classes, investment themes and time horizons, with the aim of reducing the Fund's reliance on any single source of investment returns.

The Fund seeks to achieve its investment objective by investing in a globally diversified portfolio of currencies, financial instruments including equities and equity related securities (such as warrants and preference shares), and financial derivatives, fixed or floating rate securities including corporate and/or government bonds, convertible bonds (including up to 5% of net assets in contingent convertible bonds (“CoCos”)) and inflation linked bonds.

The Fund may invest in sub-investment grade securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of any other credit agencies).

There is no specific geographic focus in relation to the securities and FDIs to which exposure may be taken. It is intended that the Fund will have a global focus in relation to securities to which exposure may be taken. However, over time it is anticipated that the Fund will have significant investments in Europe, United States of America and Asia. The Fund may also seek to gain exposure to Emerging Markets.

Financial Derivative Instruments (“FDIs”): a contract between two or more parties whose value depends on the rise and fall of the underlying asset.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Financial Derivative Instruments (“FDIs”): a contract between two or more parties whose value depends on the rise and fall of the underlying asset.

Risk and Reward Profile

Lower Risk/Reward

Higher Risk/
Reward

The Fund is categorised as a 4 due to its exposure to equity markets, which combined with its use of FDI, may cause the price of shares to fluctuate moderately.

The risk indicator was calculated using simulated data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

Equities Risk: equity investments are subject to greater price fluctuation than other asset classes due to such factors as a company's business performance, investor perceptions, stock market trends and general economic conditions which cause the Fund's share price to fluctuate more rapidly.

FDI and Leverage Risk: FDI may fluctuate in value rapidly and certain FDI may introduce leverage, which may result in losses that are greater than the original amount invested.

Counterparty/Custodial Risk: a party with whom the Fund contracts for securities or to safekeep the Fund's assets may fail to meet its obligations or become bankrupt, which may expose the Fund to a financial loss.

Liquidity Risk: there may be insufficient buyers or sellers to allow the Fund to buy or sell certain types of securities readily which may impact the Fund's performance or (in extreme circumstances) an investor's ability to redeem.

Currency Risk: changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of performance where the Fund invests in non-USD securities.

Class Currency Hedging Risk: while the Fund may attempt to hedge against currency fluctuations for non-USD classes, there can be no guarantee that the value of such class will not be affected by fluctuations in USD against the relevant currency.

Operational Risk: human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

Convertibles Risk: the Fund is exposed to the risk that the issuer of the debt or preferred stock portion of the security may fail to meet its obligations, as well as the performance associated risks of the underlying stock into which it can be converted.

Concentration Risk: because the Fund focuses investment in specific industries, events impacting these specific industries may have a greater adverse impact on performance than in a more broadly invested, diversified fund.

Please refer to the section entitled “Investment Risks and Special Considerations” in the Company's prospectus for additional information on these and other risks associated with an investment in the Fund.

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.
